1. Database:-

The database was created using XAMPP. XAMPP is a free and open-source cross-platform web server solution developed by Apache Friends, consisting mainly of the Apache HTTP Server, MariaDB database, and interpreters for scripts written in the PHP.

Database name is: “antique gallery”

Tables are:

1. cart
2. checkoutproducts
3. contacts
4. orderhistory
5. products
6. resetpassword
7. search
8. ureviews
9. users
10. wishlist

The screenshot shows the phpMyAdmin interface for the 'antique gallery' database. The left sidebar lists databases and tables. The main area displays a table of 10 tables with their details. A console at the bottom is empty.

2. Screenshots:

The screenshot shows the homepage of Galerie d'antiquités®. At the top, there's a navigation bar with links to Home, Services, Gallery, Reviews, Deals, and Contact. A search icon and a shopping cart icon are also present. The main feature is a large, ornate gold chandelier hanging from a ceiling with a dark, patterned background. Below the chandelier is a quote: "Something can be old, but it can be timeless." On the left side, there are four service highlights with icons: "Fast Delivery" (truck), "24x7 Support" (person), "Easy Payment" (credit card), and "5 Days Replacement" (box). In the center, a gold-colored banner with the text "Vintage begins here" is displayed. Below the banner are four categories: Jewellery (with an image of a necklace), Crockery (with an image of a cup and saucer), Retro Tech (with an image of a vintage camera), and Decorative (with an image of a chandelier). Further down, there's a section for "FEATURED PRODUCTS" with four items: a Victorian carnelian ring, a Kodak Signet 30 35mm film camera, an Imperial bronze Russian crockery set, and a 19th century French repoussé brass metal spice or jewelry box.
